EDUCATION

M.Sc. in Mechatronics and Information Technology

Karlsruhe Institute of Technology

Oct. 2022 – Sep. 2025

GPA: 2.3 / 1.0

B.Eng. in Mechanical Engineering

Qingdao University of Science and Technology

Oct. 2015 – Jun. 2020

GPA: 3.6 / 5.0

MASTER THESIS

Domain Generalization under Noisy Labels for LiDAR-based 3D Semantic Segmentation

Nov. 2024 – Aug. 2025 KIT Institute for Anthropomatics and Robotics (IAR)

- Designed a systematic framework to improve robustness of 3D semantic segmentation under label noise and cross-domain shifts.
- Constructed a noise sensitivity benchmark by adapting methods from image-based learning to 3D point clouds.
- Developed a dual-branch architecture with pseudo-label contrastive learning for robust domain generalization.

RESEARCH EXPERIENCE

Structured Video Understanding for Panoramic and Stereo Outdoor Hazard Scenes

Dec. 2025 – May. 2026 KIT Institute for Anthropomatics and Robotics (IAR) | Research Assistant (Hiwi)

- Developed a video understanding pipeline for panoramic and stereo scenes with hierarchical semantic representation.
- Built scene-graph representations capturing objects, hazards, and spatial relations in outdoor environments.
- Investigated LVLM video understanding across panoramic and stereo perspectives through comparative analysis.

Development of a VLA Model for Assistive and Rehabilitation Robotics

May. 2026 – Aug. 2026 KIT Institute for Anthropomatics and Robotics (IAR) | Research Assistant (Hiwi)

- Exploring VLA-based assistive robotics for elderly care and rehabilitation, including interaction dataset construction and real-world robotic evaluation.

TECHNICAL SKILLS

- **Programming:** Python (PyTorch, 3D vision, HPC), working knowledge of C++ and C
- **Languages:** Chinese (Native), English(Intermediate), German (Intermediate)
